## Entech/BPI Advanced Building Analyst Certification

### **Special Notice:**

The "Advanced BA" has now taken the place of the previous BPI Building Analyst certification. All new candidates will be certified Advanced BA.

### **Description:**

This class is the "entry level" for the Home Performance Contracting industry and concludes with a certification through the Building Performance Institute. It teaches participants the basic theory and practices necessary to work in various energy saving programs running in the Northeast. The new "Advanced BA" testable items are part of this class. Students must successfully pass an online written exam through the Building Performance Institute and pass a proctored field exam in order to receive BPI certification as a Advanced Building Analyst.

### **Prerequisite:**

This course is open to all students who have an interest and desire to learn how to perform energy audits and provide recommendations to the homeowner on improvements to improve the home's energy performance. Class consists of 5 days of intensive, comprehensive training in class and field practices.

### **Class and testing dates:**

Class runs 5 days. Typically Mon-Fri. Test dates are the following week. Written testing is done as a group. Written testing days start with a 2 hour review session immediately before the test. Written review and testing may take 4-5 hours the day of testing.

Field tests are one on one with the proctor and are scheduled after the class starts. Depending on class size, this date may be several days after the written test.

We try to meet the scheduling needs of all our students, as many of you are needed back in the field as soon as possible. Because of potential uncertainty with the time of the written and field test days, please contact Mark Schappert [mschappert@tsfee.com](mailto:mschappert@tsfee.com) 203-419-5054 for exact scheduling prior to class date.

### **Location:**

Classes are held at 145 Railroad Hill, Waterbury, CT

Member Price           \$1645

Non-Member Price     \$1645

### **Registration Policy:**

Registrations are not complete until ITEC receives payment in full. The registrant understands that after the registration deadline for each class there will be NO refunds, as after the registration deadline ITEC is obligated to the contractor for the services. The registrant may cancel a paid registration and receive a full refund if the cancellation is made on or before the registration deadline. ITEC reserves the right to cancel any class at the registration deadline if there are not sufficient numbers of registrants to run the class.

**To register:** Contact Kate Lennon at [kate@entechtraining.org](mailto:kate@entechtraining.org), or call toll free 1-866-521-4272
